DETAILED ACTION

This action is in response to papers filed on April 16, 2007

Claim 1 has been amended.

Claims 1-12 are pending.

Claims 1-12 are rejected.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 6,895,438 Ulruch; Telecommunication-Based Time-Management System and

Method, in view of US Patent 6,446,119; Olah et al, System and Method for Monitoring Computer Usage.

4. As to claim 1 Ulrich teaches importing files with information on all activity passing through a centrally located firewall to a database(C. 4 I. 59-63) wherein the files are files of internet usage, email and phone logs(C. 5 I. 49-54)

5. importing current employees and company structure information to the database(C. 2 I. 35-40).

6. providing summary reports in response(C. 2 I. 41-45), Ulrich fails to teach the reports containing all supervised employees, however, Olah teaches the employer requesting the reports to be run on one or all employees in an organization. It would have been obvious to combine Olah with Ulrich as to allow each department supervisor to track their own employees and not concern themselves with employees in other departments that they are not responsible for.

7. As to claim 2 Ulrich teaches highlighted summary reports(C. 7 I. 7-10)

8. As to claim 3 and 6 Ulrich teaches links in reports that direct to more detailed information(C. 11 I. 25-30; L. 44-46)

9. As to claims 4 and 7-12 Ulrich teaches several options for report displays and options. Ulrich does not teach each specific report type or display being created, however, it would have been obvious to one of ordinary skill in the art at the time to allow for any type of report deemed necessary by each individual organization.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
